ALL STREAMS FLOW TO THE SEA...

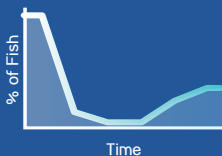

Modern wastewater treatments do not remove oxybenzone and other harmful chemical ingredients. We believe ALL water deserves to be protected, so our products have been tested for biodegradability, aquatic toxicity and coral reef safety in both freshwater and saltwater.

TEST RESULTS:

SWIMMING BEHAVIOR OF FISH AT 3, 6, 24, 48, 72 AND 96 HOURS OF EXPOSURE

STREAM2SEA

COMPETITOR

FACT #1: WE ARE **TRULY REEF FRIENDLY.**

Up to 14,000 TONS of sunscreen reaches our coral reefs each year, most with ingredients that are highly toxic to marine life.

However, simply removing banned toxins from a product and labelling it as 'reef safe' isn't enough.

*Stream2Sea is the **ONLY** mineral sunscreen **tested and proven safe** for fish and coral larvae!

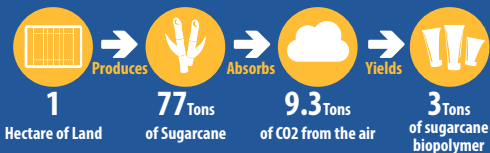

FACT #2: OUR PACKAGING IS ECOCONSCIOUS.

We don't like plastic either! Our tubes are made from sugarcane resins, our bottles from recycled milk jugs, and our baggies with biodegradable and recyclable PLA film.

We are working hard to make our products safe for you, your family, AND the sustainability of our planet.

FACT #3: WE SUPPORT OCEAN CONSERVATION.

All of us are responsible for protecting our planet for ourselves and our future generations.

Overfishing, climate change, and pollution threaten our oceans like never before.

As proud members of 1% for the Planet, we regularly support ocean conservation to help create long-term, sustainable change.

Together, we are doing better!
